- To contact BT for more info - [bt.radianz.sales@bt.com](mailto:bt.radianz.sales@bt.com)

## Customer Support Model – Global Service Centre

# Key Benefits for the BT solution:-

- **Offers rapid exposure of and transition to new Thomson Reuters services with minimal disruption for clients: many Thomson Reuters clients will be able to:**
  - a. **Transition their existing TR BT physical connectivity** to BT Radianz connectivity through a **logical service amend and service add** (new FCN service)
  - b. **Use their existing BT Radianz Cloud connections** to access Thomson Reuter's new FCN delivered products and services through a **logical service add** (new FCN service)
  
- **Utilising the established and proven BT Radianz Cloud services: part of BT Global Services Global Banking and Financial Markets Group, BT Radianz is the pre-eminent global extranet:**
  - a. and has **supported the financial markets community for more than 15 years** (from instantiation as a Reuter's | Equant initiative) and **is part of BT's 30+ year investment in specialist financial markets products and services** (includes: trading floor technology, payments, clearing and settlement messaging).
  - b. And is underpinned by BT and BT Global Services market permanence, infrastructure investment, and research and development capabilities.
  
- **BT Radianz Cloud is architected, designed and operated to support and sustain "best-of-breed" financial markets electronic communications:**
  - a. Developed to **support financial market specific applications with segment sensitive attributes** (very high availability, deterministic and predictable performance, latency and resilience).
  - b. Architected to incorporate high grade security from inception, BT Radianz is **established as a private network** designed for simple integration at client sites and ease of communication between counterparties.
  - c. **Operated, supported and designed by highly qualified, highly experienced and dedicated staff.** BT Radianz instantiates both financial market and IT standards (ITIL, ISO, FIX etc.).
