

Datasheet.

Thomson Reuters products and services available on BT Radianz Cloud.

Thomson Reuters products and services provide solutions to the global financial community – delivering critical news, information and analytics, enabling transactions and connecting communities of trading, investing, financial and corporate professionals.

For financial professionals seeking to profit from trading and investment opportunities around the globe, Thomson Reuters products and services deliver a powerful combination of information, analytics and exclusive news on financial markets – delivered in elegant and intuitive ways.

Thomson Reuters products and services cover all the major financial markets – equity, fixed income, commodities, foreign exchange – and provides effective compliance and risk management, investment management and wealth management solutions. Content and analytics packages include pricing data, financial research, global financial news and commentary, financial estimates, fundamentals analysis, and visual analysis through charting.

Thomson Reuters products and services are now available on the BT Radianz Cloud enabling new and existing members to access these services.

Please contact your Thomson Reuters sales team for more information. www.thomsonreuters.com

Benefits.

- Fast lead times and minimal disruption; most customers will continue with their existing BT infrastructure, previously used to deliver Thomson Reuters' services, to access the new service (via the BT Radianz Cloud)
- Enhanced security, associated with end to end fixed line infrastructure, which is separate from the internet
- Uses the proven BT Global network which has been successfully used to deliver Thomson Reuters' services for over 10 years.

THOMSON REUTERS™

Thomson Reuters products and services available on BT Radianz Cloud.

BT Radianz Cloud.

Comprehensive access to content, applications and services across the entire trading cycle for all asset classes. BT Radianz consolidates all of your external market connectivity on to a single connection, simplifying integration, while ensuring fast, secure and reliable access to service providers and trading partners.

Architected, deployed and operated specifically for the Financial Markets. All Radianz services are designed as resilient platforms operated specifically to meet the requirements of Financial Markets participants. Attributes include a readily exploitable community of several thousand already connected customers, via a global network of over 100 countries and over 20 finance market data centres.

The world's largest secure networked financial community. BT Radianz Cloud is a reliable and proven capability for many thousands of financial customers globally, including over 400 of the world's leading financial service providers and several thousand market participants. These include brokers, exchanges, market data providers, analytics, clearing firms. Thomson Reuters is one of those financial services providers.

Radianz capabilities.

BT Radianz Provider: application and content distribution to the largest set of on-net financial market participants that is the Radianz Global Community

BT Radianz Member: subscribe to and consume application services from the widest and deepest group of financial market Providers on any network

BT Radianz Hosting: the provision and management of client compute environments in more than 20 financial service data centres worldwide
